Paul,
USGS will arrange to bring the cores (on pallet
skids) to the Powerex warehouse later this summer
during your drilling mobilization. Dick Yager will
work out the details with Ralph Morse.
Thank you.

Subject: Cayuga - Core Boxes

As we discussed, GE is willing to take possession of
and store the core boxes at Powerex. During
installation of the wells for the pilot test we will
have a skid steer with pallet forks at Powerex. That
would be a good time for us to receive the core
boxes.
